Simple surface hygiene monitoring on-site

Hygicult contact slides are intended for microbiological hygiene monitoring on surfaces. It has been designed for reliable and time saving on-site microbial hygiene monitoring. Hygicult slides can also be used as convenient transport media if further analysis of the samples is needed.

**Reliable**
- Established method with long experience
- AOAC validated methods
- Certified by NMKL/NordVal (NordVal 018)

**Easy to use**
- Hinged slide for surface sampling
- On-site incubation and results interpretation – no counting of colonies
- No microbiological skills needed

**Flexible**
- Long shelf-life when compared to culture plates
- Storage at room temperature
- Incubation at ambient temperature or in incubator

**Hygicult for easy surface hygiene monitoring**
- Restaurants and catering services
- Beverage manufacturing
- Hospitals and healthcare centres
- Domestic homes and day care centres
- Laundries and textile services
- Indoor swimming pools and spas
- Gyms and sport centres
- Beauty and tattoo studios
- Cosmetics manufacturing
- Food production plants
- Bakeries
- Dairies
- Slaughterhouses
- Fish processing factories

**Hygicult® TPC**
- Total plate count (TPC) medium for common bacteria and fungi
- For general hygiene monitoring
- AOAC validated and NordVal certified method

**Hygicult® E**
- Violet Red Bile (VRB) medium with added glucose supports the growth of Enterobacteriaceae
- For detection of faecal contamination
- AOAC validated method

**Hygicult® E/ß-GUR**
- VRB medium with added glucose supports the growth of Enterobacteriaceae
- ß-GUR medium helps to differentiate Escherichia coli
- For detection of faecal contamination and presence of ß-glucuronidase producing microbes (especially E. coli)

**Hygicult® CF**
- Violet Red Bile (VRB) medium supports the growth of coliform bacteria
- For detection of coliforms

**Hygicult® Y&F**
- Malt agar supports the growth of yeasts and moulds
- Bacterial growth is inhibited
- For detection of fungal contamination

Cultura M incubator is for easy and handy culturing on-site with temperature range of 25–45°C. Thermometer and multirack for easy incubation of the tubes are also available.
