QuikRead go® CRP

Test before prescribing
Test before prescribing

QuikRead go CRP is an easy-to-use test for quantitative measurement of C-reactive protein (CRP). CRP is normally present at very low concentrations in the blood of healthy people. CRP concentrations are markedly increased in bacterial infections, whereas viral infections mostly induce a very modest elevation or none at all. In addition to clinical signs and symptoms, measurement of CRP can therefore effectively guide antibiotic use. Monitoring CRP levels also provides an objective means of assessing treatment response, as CRP levels fall rapidly as a result of effective therapy.

Because...

RELIABLE
- Proven quality – comparable to laboratory test results
- Reproducible quantitative CRP result within range of 5–200 mg/l

QUICK
- Fast point-of-care CRP system
- Test time 2 minutes

EASY TO USE
- Easy testing procedure
- Automatic hematocrit correction
- Performed on a finger prick blood sample (alternatively venous blood, plasma or serum)
